Frontier Photographic Prints

Full Service Pro-Prints from Negatives, Slides and Digital Files

Superior quality reprints and enlargements are made from both black&white and color negatives, slides, medium format films and digital files on our Fuji Frontier digital photographic printers. A Frontier printer images directly to photographic paper using solid state RGB lasers. The paper is then processed through traditional photographic chemistry resulting in superior quality prints having the rich look, feel and longevity of true photographic prints. All images are viewed and operator corrected for pleasing color and density. Digital scans are made at no extra charge when printing from film. These scans can be saved to CD for a small additional charge.

Frontier prints are made on Fuji Crystal Archive Lustre(E) finish.

We use Fuji Crystal Archive papers for quality and long lasting prints!

Minimum printing order is \$5.00

Reprints & Enlargements from Color or B/W 35mm, 120 and 220 film and Digital Files	Print Size (quantity per original)	1st	2-9	
	Wallet Size	M2R	0.95	0.69

	11x14, 12x12	M1114	12.95	6.65
	12x18	M1218	16.95	9.75

LightJet Standard Enlargements on Photographic Paper

Enlargements from Negatives, Slides, Transparencies & Digital Files

Standard Enlargements, color or black/white **are made from digital files**, printed on Fuji Crystal Archive photographic paper. Files are operated adjusted for pleasing color, density and contrast. **We offer an inexpensive scan from negatives, 35mm slides, medium format** and sheet films up to 4x5. Color matching is not available with this service, although a reference print is useful at the time the order is placed. Note that these prints will not match prints made using other techniques. Cropping is included in the price if we are scanning your original. Caution: cropping a digital file can adversely affect quality.

Borderless or standard 1/4" white borders are normal. Custom borders are available at additional cost.

Glossy(F), Semi-matte(N) and Lustre(E) surfaces are available.

*The "Initial First Print" price is charged on all orders regardless of quantity and includes setting up and adjusting the file to produce a superior print. Custom work includes layer masking as well as global corrections. A proof is included in the price. After the first proof, additional computer time is charged at \$85 per hour and additional proofs are \$11. Final files should be saved to CD and reorders without changes will qualify for the LEVEL 2 pricing.

The CSI LightJet is the ultimate photographic printer. Using red, green and blue lasers the LightJet images to true silver based photographic papers offering sharpness, image control and fidelity never before obtainable via traditional optical printing methods. LightJet prints on Fuji Crystal Archive paper are accepted as the standard for "fine-art" photographic gallery prints. We print from RGB tiff files. You may use any color editing space to take advantage of the wide RGB color gamut. Please review our information pages or ask for specific set-up instructions for optimum result.

LEVEL 2 Discounted First Print price for reorders from files that have been prepared, printed and archived at Photo Craft. LEVEL 2 price is also available for files that are submitted as "ready-to-print". [See our info sheets on setting up files for "ready-to-print" LEVEL 2] Customer accepts full responsibility for results when submitting files as "ready-to-print". LEVEL 2 price does not include any proofs or adjustments.

LightJet Printing to Special Photographic Materials

FujiTrans, Duratrans - Backlit Film

FujiFlex - Supergloss

Fuji Pearl

These special papers and printing materials are imaged on the LightJet from digital files. As with our Custom Digital Photographic Printing, we offer a "LEVEL 2" service on this product. Please review the protocols for LEVEL 2 printing before ordering that service. LEVEL 2 files are run as received on an "accept regardless" basis.

Available Materials:

Breathing Color Canvas - 17mil, 350gsm
MOAB Entrada Rag 190gsm, 100% cotton
Somerset Velvet 255gsm, 100% cotton
Hahnemule Bamboo 290gsm
Hahnemule Photo Rag 315gsm Baryta
Canson Photographique Baryta, 310gsm

Exhibition Print Service - Work with a Master Print Maker to obtain the most out of your image and get the highest level of quality obtainable from today's processes and materials. Extensive file manipulation or retouching is billed at \$120 an hour with additional proofs at \$20 each.
Print Ready Service - is for those that do not want us to make any adjustments to the file. It is ready to print as is. If requested we can make minor adjustments to overall color and density and add some sharpening, but we will not make any layer adjustments or color matching. If in doubt as to the final results we strongly recommend ordering a PROOF for \$20 prior to making the final print.

Add'l Prints - This price is for additional prints of the same file printed at the same time and all at the same size. A first print price (Exhibition or Print Ready) is always charged regardless of quantity ordered. **Canvas prints** are printed with a minimum of two inches of white border. If ordering a printed border for wrapping add 10% to price of print.

PROOF PRINTS - \$20 each (proof prints are not intended to be final prints)

**Sommerset Velvet and
Hahnemule Bamboo**

Sommerset Velvet 255 GSM, 19 mil, 100%

Hahnemule Bamboo 290 GSM, 90% bamboo fiber/10% cotton

DiBond

Direct UV printing to 3mm Silver or Gold DiBond . DiBond can be printed using white ink for added creative effects.

Prices are based on "ready to print" files. If in doubt order an 8x10 first. Use that as a proof as we will not redo Metal Prints at no charge

Drilling	2.00	per hole
Cleats and frame backs, see mounting/laminating page		
Radius corners	2.00	extra per print (square corners are very sharp)
Shipping crate	125.00-150.00	depending on size

<u>Spot White Ink on DiBond</u>	
5x7 thru 16x24	25.00
18x24 thru 24x36	35.00
30x40 thru 40x60	50.00
40x60 thru 48x96	75.00

**Standard finish is High Gloss white. Some sizes and finishes require special order.*

Digital Press - Books

Book Pricing

Book Pricing consists of two parts; the Book Block and the Cover

Price is per page. A page is one side of a sheet. A 20 page book will have 10 sheets of paper plus end-sheets (a blank sheet in front and back that has no printing on it and is included in the cost of the cover) Books blocks have a minimum of 20 pages.

Soft covers are only available on 8.5x11 portrait and 8x8 square

Drum scans are available at resolutions up to 8000 dpi. Drum scans are fluid mounted, scanned in 16 bit color, meticulously inspected and cleaned for superior results. Available from 35mm slides and negatives up to 8X10 inch sheet film. (When ordering scans from negatives always supply an accurate photo print as a guide). We are also able to supply Grayscale and CMYK scans on request. NOTE: We scan, work and print in an ICC compliant environment. Our scanning is oriented toward full color photographic and wide gamut inkjet printing and is not press-ready as in a typical "pre-press" scan. When ordering scans without prints we highly recommend purchasing a Match Print. Scans saved to CD or DVD or posted to FTP.

***27mb files are not available from film larger than 6x9**
***All file sizes are based on 8 bit color**

All drum scans are fluid mounted and the files are digitally cleaned at 100%. Originals requiring excessive cleaning will be charged for retouching at \$90 per hour. Files are delivered in 8 bit color using the Adobe(1998)RGB color editing space. Files can be delivered in 16 bit color and in the scanner color space if requested. Files can be converted to CMYK. CMYK files are delivered in US Web Coated (SWOP)v2 default colorspace. We strongly recommend ordering "Match Prints" (\$18) when making scans to be printed by other companies. Photo Craft will not redo scans because other companies cannot print them correctly.

Scanning - Imacon or Plateau Repro Scans

These scans are near drum quality at a fraction of the price. Scanning at 16 bit color depth and at true optical resolutions up to 8000 DPI, these scans are sharp, density and color balanced. Scans are delivered as 8 bit RGB TIFF or JPEG files in Adobe(98) or sRGB. Repro Scans are great for making photographic and inkjet prints; posting on the internet; and for most desktop, four-color and offset printing applications. Repro Scans are offered on a “scan once, many uses” basis and will require adjustment and possibly digital cleaning depending on the use to which you will apply them. This is called “repurposing” the file for the intended use. Repurposing and digital cleanup is available on an a la carte basis.

Note: Dark slides or positives may not scan well with this service.

From the following original formats:

From medium format (120/220 and 70mm) film including panoramic formats (6x17 cm)
 4x5, 5x7, 8x10 and 11x14 sheet film including aerial films (8x8 and 10x10) and X-ray films
 (areas less than 12x18 inches)

Photographic PRINTS and FLAT ART up to 11x17

Files are delivered in TIFF or JPEG format.

We scan at the nearest true optical resolution to create a file size nearest to that requested. Exact file size will vary depending on the image and film format.

Originals are clean of dust but digital clean-up is not included in the price. Fluid mounting is not available with this service.

Digital cleanup and setting up files for particular use - \$85 per hour.

Scans are written to CD for \$5.00 per CD or DVD for \$30 per DVD. (CD's include an index print of the images.)

Files placed on Dropbox for customer access

\$5 - \$25 depending on number and size of files.

**Price is based on the file size of an uncompressed RGB TIF in 8 bit color*

This pricing is an estimate, per square foot, based on the total square feet in the job and having Ready to Print files (PDF or TIFF)

Minimum charge per file if we have to do any file setup or adjusting \$25.00

CI for file work \$85.00 per hour

*Banners include tape and double stitched hems, pole pockets and normal grommets.

Add a dollar each for wind slits (we do not recommend wind slits)

** Economy banners include taped hems and normal grommets only. 10oz banner material is not recommended for extended outdoor use.

You can subtract 5% for no hemming. We will put in reinforced grommets.

Watch your sizes and quantities. Don't quote a 24"x120" banner on 15oz material at the straight square foot price. The material is 98" inches wide.

Think about your usage

Scanning Services Comparison Chart Drum Scans / Repro Scans / Frontier Scans

“Scan Once - Many Uses” Methodology

The idea is to create one image file that is kept as your Master. This file is kept large, unadjusted and in as wide a color gamut as possible. Then duplicate files are made and adjusted for a specific purpose. Each time this is done, it is called “repurposing”. For this reason you want to order a file that will satisfy the largest use you are likely to need. For example, if you know you will want to make 8x10 inch prints and post images onto the internet, you might make a 21 Mb file which will be plenty for an 8x10 and can be resized down for use on the web. If you started with a small file that would be good for the internet then it would not have sufficient resolution to make a good 8x10. Files will be delivered with a good density and color balance. If you are ordering prints from us the files will be cleaned, adjusted, sharpened, and “print ready”. If you have ordered scans only you will need to make the final and critical adjustments to prepare your files for your particular use.

Optical Scan Resolution in DPI	Size of Original Film					
	35mm	6 x 4.5cm	6 x 6cm	6 x 7cm	4 x 5"	8 x 10"
8000	248Mb	680	n/a	n/a	n/a	
4000	62	170	225	290	865
